

# EVERY ACRE COUNTS

*production practices for greater profitability*

## **Goal**

To improve on farm profitability, diversity, and ecosystem benefits of agriculture by using precision technologies to empower producers to help make informed management decisions for every acre of their operations.

## **Outcomes**

Provide information to producers that will increase their return on investment and enhance land management approaches that benefit the sustainability of land, water, and all natural resources.

## **Producer Benefits**

- Free profitability analysis.
- Increased farm profitability.
- Working lands flexibility.
- Improved soil health.
- Improved water quality.
- Increased wildlife habitat.
- \$150 per acre over 5 years.
- \$50 per acre for seeding costs.
- No commitments required.
- Very flexible program.
- Highest level of data confidentiality provided.
